

WATERSHED LEATHERS

The phrase "waterproof leather" to many conjures up thoughts of "Performance," "Easy Care", "MVTR's". Many times waterproof leathers also come at the expense of character and hand. Irving's **Watershed line of leathers** is tanned, conditioned, and crafted so that you get the features necessary with a waterproof or easy care product without sacrificing the beauty and character of a non-waterproof leather.

If you're looking for something different in a waterproof product, we have an opportunity for you. Custom crafted Watershed leathers with character, feel, and packed with performance.

You CAN have your cake and eat it too.

Atlantis

Imagine a soft, supple, naturally tumbled leather with a round, plump hand and silky drag. In the same thought see that leather made into a rugged boot stomping through mud, puddles and anything else that may be in your way. Our soft Watershed tannage offers all of the above characteristics with the promise of a fully waterproof/high performance leather. This quality tannage will protect the foot from the environment on the outside while allowing moisture and vapor to escape from the inside enhancing comfort and allowing the wearer to concentrate on the work at hand. For your customers who venture a little too close to the sea and surf in their new boat shoes or sandals, this leather will dry lickety split. Available for sampling in HH 2.0-2.2 mm.

Xtreme

The trumpets sound. The crowd is silenced. The King has arrived. Not everyone is invited as this gathering is only for the high powered elite. The decision makers; the movers and shakers. That's where you find Xtreme. A full grain smooth with a round, plump hand and an oily drag. This fully aniline, most distinguished leather is the ultimate in performance and offers its user the look and feel of one of America's finest products. Crafted with only the finest of materials, Xtreme will stand the test of your manufacturing process and give you an end product you're proud of. Try it in sandals, casual oxfords, and boat mocks. It'll look great in boots too! Available for sampling in H 1.8 -2.0 mm.

Outcast

Rugged as the day is long. Outcast with its bold temper and blackened top represents the outdoors and all that comes with it. Bring on the weather. This waterproof waxy nubuc laughs at the challenge to bring your customer home dry from that summer rainstorm, a long day in a muddy field, or a relaxing day on the boat. Sandals are a must as well. With its low water absorption properties you won't have to worry about getting them wet....they'll be dry before you can say "sunburn".
