Maestro Like a fine piece of art, Maestro is slowly crafted from conception to finished product. Not by one artist, but by a dedicated team. Our tanners provide the crust: soft, light-weight, and in a full range of color. Our technical people take it from there. With a light tumble and a spritz of this and that, Maestro develops into the mature product it was meant to be. Colors are many and limitations few for Maestro.

Product available only in lighter weights. Available for sampling in LM 1.2-1.4 mm.
